RE: DELIVERY CALL AND ACCOUNTING REPORT REQUEST OF MANAGED
RECHARGE WATER SUPPLIES

Dear Watermaster;

Pursuant to your request, please be advised of the 2006 delivery call for the recharge water rights pursuant to Water District 34 Distribution Rule 40.05. and the provisions incorporated into the Plan of Operation and made part of water rights 34-7571 and 34-7573.

To date it appears significant recharge water supplies are being diverted at most recharge sites within the water district with some exceptions. The Plan of Operation requires the monitoring, evaluation, and accounting of all recharge sites on a regular basis. Because of this requirement and the recent efforts by the Director of IDWR to improve regulation and accounting of water supplies in Water District 34, I am also requesting a year-to-date summary (April 1 through May 20) for each site that has been used as a point of diversion for managed recharge and the daily total quantity diverted at each of those sites during this reporting period. At the suggestion of IDWR, this first report is due to the recharge committee by May 22, 2006. Please forward a copy of this report directly to my mailing address at 3871 West 2500 North, Moore, Idaho, 83255.

Please notify your respective deputies and staff of this delivery call and requested report. Thank you for your prompt attention to these matters.

Sincerely,

Mitchell D. Sorensen, Recharge Committee Chairman
